Product Overview

Precision Brewing Performance

This 1.7L electric kettle is engineered for efficiency and precision, featuring an integrated analog temperature gauge that allows users to monitor water heat in real-time. Designed with a classic aesthetic and practical functionality, it includes a 360-degree cordless base for effortless handling and a concealed stainless steel heating element for rapid boiling. Safety is prioritized with built-in overheat protection and an automatic switch-off mechanism, making it an ideal choice for professional or commercial environments.

Technical Specifications

Capacity	1.7 L
Heating Element	Concealed stainless steel
Base Design	360-degree cordless

Features & Functionality

Safety Mechanisms

- Overheat protection
- Automatic switch-off
- Manual switch-off

Operational Metrics

1.7 L Max Capacity	360 degrees Base Rotation
------------------------------	-------------------------------------

Key Features	Temperature Gauge, Water Level Indicator, Integrated Filter, Cordless Operation
