

1.7L Glass Electric Tea Kettle with Infuser

This electric kettle features a transparent glass body to easily monitor water levels. It is equipped with a stainless steel infuser for brewing tea directly within the kettle.

Product Overview

Versatile Glass Electric Kettle

This 1.7L electric kettle combines a transparent glass body with a stainless steel infuser, allowing for direct tea brewing and easy monitoring of water levels. Designed for efficiency and safety, it features a 1500W heating element and comprehensive protection systems. The sleek design with a 360-degree base makes it a practical addition to any professional or domestic kitchen.
