

18" Active PA Subwoofer

The KW181 is a professional-quality active PA subwoofer. The lightweight and rugged birch cabinet houses an 18" woofer to deliver deep, thumping bass with frequencies as low as 35Hz.

Product Overview

High-Output Active Performance

Designed for professional sound reinforcement applications, this 18-inch active subwoofer delivers powerful and extended low-frequency response. It features an efficient 1000-watt Class D amplifier to handle demanding live environments. With integrated DSP technologies for driver protection and signal optimization, it ensures reliable performance for live music, DJ events, and permanent installations.

Technical Specifications

Amplifier Power

1000 W

Power Output
