Product Overview

Versatile Primary Wire for Demanding Environments

This general-purpose PVC insulated wire is engineered for reliable performance in automotive, truck, trailer, and marine applications. Designed for point-to-point, low-voltage wiring, it features a smooth, durable jacket that resists grease, oil, and acid. Built to meet SAE J1128 standards, this single-conductor copper wire ensures dependable connectivity for various electrical projects.

Technical Specifications

Operating Temperature

-40 °C

Minimum Temp

90 °C

Maximum Temp

Wire Gauge	18 AWG
Voltage Rating	60 V
Compliance Standard	SAE J1128
Conductor Material	Stranded Copper

Customization & Options

Customization Options

- Custom lengths available
- Custom packaging options

Available Colors	Red, Black, Blue, Yellow, White, Green
