Overview

High-Performance Agricultural Tractor

This 180 HP 4WD agricultural tractor is engineered for dry land and multifunctional farming applications, utilizing advanced technology for superior reliability. It features a robust chassis, a high-torque engine with a 30% torque reserve, and a versatile transmission system designed for ease of operation. With a focus on operator comfort and heavy-duty capability, this machine is equipped to handle demanding tasks like plowing, tilling, and hauling with efficiency.

Performance

Emission Standard

Euro II

Engine Horsepower	180 HP
Maximum Traction Force	35 kN
Torque Reserve Coefficient	30 %

Hydraulics & PTO

Lifting Capacity

40 kN

Standard Lifter

45 kN

Electronic Wet-Type PTO

PTO Rotation Speeds

- 540
- 720
- 850
- 1000

Hydraulic System

Four-way hydraulic output

Transmission & Drivetrain

Gear Configuration

16 Forward + 8 Reverse (Synchronizer)

Drive Type

4WD

Compliance & Certifications

Certifications

OECD, E-mark, EAC

Specifications Table

Key Technical Specifications

Feature	Specification
Fuel Tank Capacity	350 L
Three-Point Hitch	Category III (Optional Category II)
PTO Splines	Optional 6/8/21 switchable
