Product Overview

High-Performance Grinding Solution

This 180mm abrasive grinding wheel is engineered for effective material removal on stone, metal, and concrete surfaces. Featuring a depressed center design and a robust fiberglass reinforcement, it provides reliable performance and durability for demanding grinding tasks. Manufactured with high-quality aluminum oxide, this disc ensures consistent results and efficient self-sharpening during operation.

Technical Specifications

Dimensions

180 mm
Diameter

6 mm
Thickness

22 mm
Bore

Performance Ratings

80 m/s
Max Speed

Construction Materials

Aluminum Oxide, Fiberglass Reinforcement, Synthetic Resin Bonding

Usage & Compatibility

Compatible Materials

Metal, Iron, Stainless Steel, Stone, Concrete, Wood

Logistics & Packaging

Packaging Configuration

Unit	Quantity
Inner Box	25 pcs
Carton	2 inner boxes
