

180 x 6 x 22 mm Grinding Wheel

This 180 x 6 x 22 mm grinding wheel is suitable for general purpose metal and stainless steel grinding. It is made of normal grade corundum with a medium hard bond, providing an optimal ratio between grinding performance and disc life.

Product Overview

General Purpose Grinding Solution

This 180mm grinding wheel is designed as a versatile, general-purpose solution for both stainless and carbon steel applications. Constructed with normal grade corundum and a medium hard bond, it offers an optimal balance between aggressive material removal rates and extended disc life. Engineered for high-speed performance, it is compatible with angle grinders and other high-speed power tools.

Technical Specifications

Max Operating Speed

80 m/s
Max Speed

Outer Diameter	180 mm
Thickness	6 mm
Bore Diameter	22.2 mm
Abrasive Specification	27-A 24 R4 BF

Material & Construction

Abrasive Material	Normal grade corundum
Bond Hardness	Medium hard
Reinforcement	Yes

Compliance & Standards

Standards	JB/T3715-2006, MPA, CCIC
-----------	--------------------------

Applications

Suitable Materials

- Stainless Steel
- Carbon Steel
- General Metal
