

180x6x22mm Grinding Wheel for Stone

This grinding wheel measures 180x6x22mm and is specifically designed for stone applications. It is constructed with C30N8BF abrasive material and operates at a maximum RPM of 8,500.

Product Overview

High-Performance Stone Grinding

This professional-grade grinding wheel is specifically engineered for effective stone material processing. Built to rigorous safety and quality standards, it offers reliable performance for industrial and construction applications. The wheel is designed for optimal balance and durability, ensuring consistent results during heavy-duty grinding tasks.

Technical Specifications

Dimensions

180 mm
Diameter

6 mm
Thickness

22 mm
Bore Diameter

Operational Limits

8500 RPM
Max RPM

80 m/s
Max Speed

Abrasive Material

C30N8BF

Compliance & Safety

Safety Guidelines

- Always use safety guards
- Ensure correct mounting before use
- Do not exceed maximum RPM
- Observe all safety warnings

Certifications & Standards

EN 12413, ISO 9001
