

185NL Single-Cylinder Water-Cooled Diesel Engine

This water-cooled diesel engine is a robust and reliable power source. It features a single-cylinder configuration, efficient heat dissipation, and stable performance.

Overview

Robust Power Solution

The 185NL is a reliable single-cylinder diesel engine engineered for consistent performance in demanding industrial and agricultural environments. Featuring an advanced water-cooling system, it ensures efficient heat dissipation and stable operation during prolonged use. Its compact, durable cast iron construction provides longevity, while the direct injection fuel system optimizes combustion for better efficiency.

Technical Specifications

Power Output

8 HP

Min Output

10 HP

Max Output

Rated Speed

2200 RPM

Min Speed

2600 RPM

Max Speed

Engine Type	Single-cylinder, 4-stroke
Cooling System	Water-cooled
Displacement Range	400-500cc

Features

Key Features

- Direct injection fuel system
- Mechanical speed governor
- Durable cast iron cylinder block
- Accessible service points for easy maintenance

Applications

Typical Applications	Agricultural machinery, Small power generators, Industrial equipment
