

18V Replacement Ni-CD/Ni-MH Power Tool Battery

This is a replacement 18V Ni-CD/Ni-MH battery for power tools. It offers reliable power and extended runtime for cordless drills, saws, and other compatible tools.

Product Overview

Reliable 18V Replacement Power Solution

This 18V replacement battery is designed for high-performance power tools and energy storage applications. Compatible with both Ni-CD and Ni-MH systems, it serves as a versatile power source for cordless drills, saws, and other professional equipment. Built with durability in mind, it features integrated safety mechanisms to protect against overcharging and overheating during intensive use.

Technical Specifications

Voltage

18 V

Nominal Voltage

Battery Chemistry	Ni-CD, Ni-MH
Model Number	A1718

Physical Properties

Weight	900 g
--------	-------

Application & Usage

Primary Applications

- Power Tools
- Energy Storage
- Cordless Drills
- Saws

Manufacturing Details

Place of Origin	Guangdong, China
-----------------	------------------

Safety & Design

Protection Features

Overcharge Protection • Overheat Protection
