

# 18W SMD T8 LED Tube Light

This 18W SMD T8 LED tube light delivers efficient and bright illumination. Its T8 form factor allows it to replace traditional fluorescent tubes and the SMD LEDs provide a consistent daylight output.

## Product Overview

### High-Efficiency LED Illumination

The 18W SMD T8 LED Tube Light is designed as a direct, energy-efficient replacement for traditional fluorescent tubes. Utilizing advanced Surface Mount Device (SMD) technology, this lamp delivers uniform, consistent, and bright illumination that simulates natural daylight. It is an ideal lighting solution for a variety of indoor environments, including office spaces, retail establishments, and residential areas, offering both energy savings and an extended operational lifespan.

## Technical Specifications

|                   |                            |
|-------------------|----------------------------|
| Power Consumption | 18 W                       |
| Form Factor       | T8                         |
| LED Technology    | SMD (Surface Mount Device) |
| Light Color       | Daylight                   |

## Application

|                       |  |
|-----------------------|--|
| Suitable Environments | Offices, Retail Spaces, Residential Areas, Indoor Lighting |

## Key Features

### Key Benefits

- Energy efficient design
- Long operational lifespan
- Uniform and consistent light output
- Direct replacement for fluorescent tubes
