

190-225W Monocrystalline Solar Panel

This solar panel utilizes monocrystalline silicon to efficiently convert sunlight into electricity. It is engineered for durability and long-term performance, suitable for residential, commercial, and industrial applications.

Product Overview

High-Efficiency Solar Power

This 190W-225W monocrystalline solar panel is engineered for optimal energy conversion and long-term reliability. Built with high-quality single crystal silicon cells, it is designed to withstand diverse environmental conditions for both residential and commercial applications. Its robust, weather-resistant construction ensures sustained performance and secure mounting in various solar energy systems.

Technical Specifications

Power Output Range

190 W Minimum Power	225 W Maximum Power
-------------------------------	-------------------------------

Cell Technology

54 Monocrystalline 6-inch cells

Industry Standards

Safety Compliant, Performance Certified

Physical Attributes

Build Quality

- Robust frame design
- Weather-resistant materials
- Single crystal silicon construction

Application Fields

Residential • Commercial • Industrial
