

190T Nylon Fabric

This is a 190T nylon fabric. It is known for being lightweight and potentially water-resistant.

Overview

High-Quality 190T Nylon Fabric

This 190T nylon fabric is a versatile and lightweight material designed for high-performance apparel and outdoor gear. Its dense weave provides a smooth finish and natural water-resistant properties, making it an excellent choice for protective layering. Durable yet breathable, it is specifically suited for garments that require a balance of utility and comfort.
