

196cc Gasoline Engine with Recoil Starter

This 196cc gasoline engine is designed for a variety of applications. It features a durable construction with a cast iron cylinder sleeve and an overhead valve (OHV) design.

Product Overview

High-Performance 196cc OHV Engine

This robust 196cc gasoline engine is engineered for versatility and reliability across professional-grade equipment. Featuring an overhead valve (OHV) design, it achieves superior combustion efficiency while maintaining lower emissions. The integrated cast iron cylinder sleeve provides enhanced durability for long-term service life in demanding work environments.

Technical Specifications

Design Advantages

Compact Size • Lightweight • OHV Technology

Engine Displacement	196 cc
Starter Type	Recoil Starter
Cooling System	Air Cooled
Safety Features	Low Oil Shutdown, Cast Iron Cylinder Sleeve

Applications

Common Applications

- Portable Generators
- Water Pumps
- Lawn Mowers
