Overview

High-Performance 196cc Vertical Shaft Engine

This 196cc vertical shaft engine is engineered for reliability, durability, and ease of use in professional and residential outdoor power equipment. Featuring a patented heat dissipation system and optimized combustion, it ensures cooler operation and a longer service life. With multiple global certifications and optional EFI technology, this engine provides a versatile, efficient, and low-noise power solution.

Performance

Supported Operating Speeds

- 3000
- 3600

Displacement

196 cc

Key Features

Engine Advantages

- Patented heat dissipation and air guide system
- Easy-start recoil system
- Low noise and vibration output
- Optional EFI for improved fuel economy and power

Global Standards

CE, EPA, CARB, EURO-5

Maintenance & Safety

Fuel and Handling Guidelines

Always operate in well-ventilated outdoor areas. Use fuel with no more than 10% ethanol or 5% methanol to prevent fuel system damage. Ensure the engine is cool before refueling and handling. This product contains components related to lead and lead compounds.
