

19mm Drilling Machine

This drilling machine is a robust tool designed for precision drilling applications on various materials. Featuring a 19mm drilling capacity and adjustable voltage settings, it ensures reliable performance and consistent results.

Overview

Professional ZX-19G Drilling Machine

The ZX-19G is a precision-engineered drilling machine built for high-performance industrial tasks. With a robust 19mm drilling capacity and a versatile variable speed range, it provides consistent results across diverse materials. Its compact, stable design and durable construction ensure longevity and efficiency in any professional workshop environment.

Performance Specifications

Key Performance Indicators

19 mm

Max Borehole Diameter

550 W

Motor Power

100 mm

Spindle Stroke

Spindle Details

Metric	Value
Spindle Taper	MT2
Speed Range	250-3200 RPM
Speed Series	12 levels

Technical Dimensions

Physical Dimensions

- Total Height: 1100 mm
- Table Size: 350 mm Diameter
- Table Itinerary: 406 mm
- Column Diameter: 80 mm
- Spindle Center to Column: 199 mm

Logistics

Weight and Packaging

Net Weight: 95kg, Gross Weight: 105kg, Packing Size: 1050x600x300mm
