

19mm Metal Push Button with Buzzer

This 19mm metal push button features a continuous tone buzzer and welding type terminals. It is designed for robust applications, providing both visual and audible feedback.

Overview

Rugged Industrial Signaling

This 19mm metal push button is engineered for demanding industrial environments where both visual and audible feedback are required. Featuring a continuous tone buzzer, it ensures clear signaling for machinery and control panel operators. The robust metal construction and secure welding-type terminals provide long-term reliability and stability.

Technical Specifications

Mounting Diameter	19 mm
Buzzer Type	Continuous Tone
Operating Voltage	24 V
Termination Style	Welding Type

Features

Key Features	Metal Construction, Audible Feedback, Industrial Grade, Secure Connection
--------------	---

Applications

Typical Applications

- Industrial Control Panels
- Heavy Machinery
- Signaling Systems
- Automation Equipment
