

# 1L Thermoelectric Ice Cream Maker with Auto Shut-Off

This 1L thermoelectric ice cream maker is portable and self-cooling. It features an auto shut-off function and is made with food-grade materials for ease of use.

## ADDITIONAL IMAGES

## Overview

Create delicious, professional-grade homemade ice cream with ease.

### Advanced Thermoelectric Ice Cream Maker

This 1L thermoelectric ice cream maker offers a convenient, self-cooling solution for creating professional-quality homemade desserts without the need for pre-freezing bowls. Utilizing solid-state thermometric cooling technology, it provides a safe and reliable way to prepare ice cream, gelato, and sorbet with a smooth, creamy texture. Its compact design and auto shut-off feature make it an ideal addition to modern kitchens seeking efficiency and ease of use.

#### Key Features

Portable, Self-cooling, Auto Shut-off, Food Grade, Easy to Operate

## Performance & Capacity

### Performance Metrics

**1000 ml**  
Net Volume

**120 W**  
Power Input

**220 V**  
Voltage

## Technical Specifications

Optimized ventilation system for efficient thermoelectric cooling.

Equipped with 18A safety electrode contacts for reliable operation.

### Electrical Requirements

- Voltage: 220V~
- Frequency: 50Hz
- Power: 120W
- 18A safety electrode contact

### Unit Dimensions

300 x 218 x 215 mm

## Design & Operation

Simple four-step process to enjoy fresh frozen desserts.

Integrated 3D stirring ensures smooth texture and even cooling.

### Operational Features

- 3D Stirring for consistent texture
- Silent operation motor
- Perfect ventilation system
- Transparent lid for monitoring
- Adjustable settings for hard and soft consistencies

## Logistics

### Packaging Dimensions

Dimension Type	Width (mm)	Height (mm)	Depth (mm)
Unit Size	300	218	215
Packing Size	349	283	274

## Compliance

### Certifications
