

1U Horizontal Cable Management Rack

This 1U cable management rack is designed for organizing and routing network cables within a server rack or cabinet. Constructed from durable materials, this rack provides horizontal cable management, reducing cable clutter and improving airflow.

Overview

Professional Cable Management Solution

This 1U Horizontal Cable Management Rack is designed to streamline and organize network cabling within server racks and cabinets. By reducing cable clutter, it significantly improves airflow and facilitates easier maintenance of network infrastructure. The unit features slotted channels for efficient cable routing, ensuring a clean and professional server environment.

Technical Specifications

Rack Height	1U
Compatibility	Standard 19-inch server racks
Model Identifier	SC5001

Features

Key Features

- Horizontal cable management
- Slotted channels for easy insertion and removal
- Durable construction
- Improved airflow efficiency
- Reduces cable clutter
