Product Overview

Professional Cable Management Solution

This 1U brush panel is an essential component for maintaining organized and efficient server rack environments. Designed for standard 19-inch enclosures, it features dense brush strips that allow for seamless cable routing while effectively sealing the opening. By preventing dust and debris from entering the rack, this panel helps protect sensitive equipment and improves overall airflow management.

Physical Specifications

Rack Unit Size	1 U
Mounting Compatibility	Standard 19-inch rack
Construction	Metal Frame, Brush Strips
