

1U Rackmount Network Appliance Server

This network appliance server supports Intel LGA775 800/1066MHz FSB CPUs. It also supports up to 4 hot-swap SATA hard disks.

Overview

High-Performance 1U Network Appliance

This 1U rackmount network appliance server is engineered for demanding network environments where space efficiency and reliability are paramount. Designed with a compact form factor, it integrates seamlessly into standard server racks while providing robust connectivity options and storage capacity. It serves as a versatile foundation for various network application tasks, ensuring consistent performance for professional operations.

Physical Specifications

Form Factor	1U Rackmount
Device Type	Network Appliance Server

Connectivity & Interfaces

Front Panel Connectivity

- USB Ports
- Network Interfaces
- Drive Bays

Key Features

Design Focus

Robust • Versatile • Compact

Suitability	Network Security, High Availability, Space-Constrained Environments, Reliable Performance
