

2 1/2 Inch 300lb Swing Check Valve

This 300lb swing check valve prevents backflow in piping systems. It is suitable for industrial applications where reliable backflow prevention is critical.

Overview

Industrial Swing Check Valve

This 2 1/2 inch swing check valve is engineered for robust performance in demanding industrial piping systems. Designed to allow flow in only one direction, it effectively prevents backflow and protects critical equipment. Featuring a durable bolted bonnet design, this valve ensures reliable operation and facilitates straightforward maintenance and inspection.

Technical Specifications

Pressure Rating

300 lb

Pressure Class

Design Standards

- API Swing Check Valve
- Bolted Bonnet Design

Nominal Size

2 1/2 inch

Material Construction

WCB, Stainless Steel

Application

Primary Function

Backflow prevention in industrial piping systems
