Overview

High-Performance LPG Material Handling

This LPG-powered forklift is engineered for versatile material handling across industrial, warehouse, and manufacturing environments. With a flexible lifting capacity ranging from 2 to 3.5 tons, it provides a cleaner, cost-effective alternative to traditional diesel or gasoline models. Designed with operator comfort and safety in mind, it features an ergonomic cabin and robust construction for reliable daily operation.

Performance Metrics

Lifting Capacity Range

2 ton

Minimum Capacity

3.5 ton

Maximum Capacity

Technical Specifications

Power Source	Liquid Petroleum Gas (LPG)
Key Features	Robust Chassis, Telescopic Mast, Hydraulic Lifting System, Ergonomic Cabin, Safety Cage

Operational Suitability

Ideal Environments

- Warehouses
- Distribution Centers
- Manufacturing Plants
- Construction Sites
- Indoor and Outdoor Facilities

Safety Equipment

Overhead Guard • Safety Lights • Ergonomic Controls • Durable Tires
