

2-Gang 1-Way Surface-Mounted Light Switch

This surface-mounted light switch features a 2-gang, 1-way configuration. It is constructed with fire-resistant materials and offers easy installation for controlling two separate lighting circuits.

Overview

Professional Surface-Mounted Control

The M44 Series 2-Gang 1-Way light switch is a robust solution designed for demanding environments. Featuring a modular design and UV-resistant PC construction, it offers a 2mm outer thickness for heavy-duty outdoor durability. With tool-free cable installation and integrated safety features like fire-resistant housing and an earthing terminal, it provides a reliable and secure electrical interface for professional installations.

Design & Construction

The M44 series is engineered for durability with 2mm thick UV-resistant housing and tool-free installation.

Material Composition

- Cover/Frame/Button: UV-resistant PC
- Bottom Plate: PP
- Housing Thickness: 2mm

Installation Details

- Mounting Type: Surface Mounted
- Terminal: Screw terminal
- Installation: Tooling-free cable installation
- Wiring: Extra internal space for complex configurations

Product Features

Core Advantages

Modular Design, UV Resistant, Earthing Terminal, Optional LED Locator, Tamper-Resistant Option

Compliance & Standards

Regulatory Compliance

- European Standard
- CE Certified
