Overview

Versatile 2-in-1 Blending Solution

The B163 Food Blender is a high-performance kitchen appliance designed for international B2B markets, featuring a powerful 400W motor and a dual-container system. It combines a large 1500ml glass jar for smoothies and soups with a dedicated dry mill attachment for grinding coffee beans and spices. The intuitive LED-illuminated control panel and safety interlock system ensure both ease of use and operational security for professional or home environments.
