

2-in-1 Laser Tape Measure with 5m Tape and 40m Laser Distance

This 2-in-1 laser tape measure includes both a 5.5m standard tape with a 19mm blade width and a 40m laser distance measurement capability. The compact tool features a black blade for enhanced visibility.

Product Overview

Professional 2-in-1 Measurement Solution

This versatile measurement tool combines a traditional 5.5-meter retractable tape measure with advanced 40-meter laser distance technology. Designed for accuracy and efficiency, it features a high-visibility black blade and a compact form factor suitable for diverse professional environments. Built to rigorous standards, this tool is an essential asset for precision tasks requiring both manual and long-range digital measurements.
