

2-in-1 Soldering and Hot Air Rework Station

This is a 2-in-1 soldering station that combines a soldering iron and a hot air rework station. It features digital temperature control for precise soldering and rework operations.

Overview

Professional 2-in-1 Rework Solution

This versatile 2-in-1 rework station combines a high-precision soldering iron with a powerful hot air rework tool in a single, space-saving unit. Designed for electronics repair, prototyping, and SMD rework, it features independent digital temperature controls for both functions. The integrated digital display ensures accurate monitoring, allowing for consistent performance across a wide range of soldering and desoldering tasks.

Technical Specifications

Control Features

- Digital temperature control
- Adjustable air flow
- Independent controls for soldering and hot air
- Digital temperature display

Primary Applications

Electronics Repair • Prototyping • Hobbyist Use

Device Type

2-in-1 Soldering and Hot Air Rework Station

Core Functions

Soldering, Hot Air Rework, SMD Rework
