

2-Inch API 150lb Flanged Ball Valve

This 2-inch ball valve is designed with API flanges for secure installation. It is rated to 150lb and provides reliable flow control in industrial applications.

Product Overview

Industrial Flow Control Solution

This 2-inch API flange ball valve is engineered for industrial applications requiring reliable and precise flow control. Rated at 150lb, it features a robust construction with flanged connections to ensure secure and leak-proof installation. Designed for durability and tight shutoff capabilities, this valve maintains consistent performance even in demanding operational environments.

Technical Specifications

Pressure Rating

150 lb

Pressure Class

Nominal Size	2 inch
Material	WCB, Stainless Steel

Design Features

Standards

API

Connection Type	Flanged
