Product Overview

High-Performance CO2 Fire Suppression

This aluminum CO2 fire extinguisher is engineered for professional fire safety, specifically targeting Class B flammable liquid fires and Class C energized electrical equipment fires. Constructed from durable, lightweight aluminum, it features a reliable brass valve and is manufactured under strict ISO9001 quality systems. Designed for efficiency and safety, each unit undergoes 100% helium leak detection to ensure long-term reliability in critical environments.

Technical Specifications

Transport Classification

- Non-Flammable
- Non-Toxic Gas
- UN No. 1044
- Class 2.2

Suitable Fire Classes

Class A, Class B

Operating Temperature Range

-30°C to +60°C

Electrical Safety Rating

Up to 1000V (per DIN VDE 0132 standards)

Certifications & Standards

Certifications

CE Approved • EN3 • ISO 9001 • DIN • GS • MED

Construction & Design

Construction Materials

- Aluminum Cylinder
- Brass Valve
- Phosphated Treated
- Powder Coated Finish

Quality Assurance

100% Helium Leak Detected
