Product Overview

High-Performance Cleanroom Wipers

These 2-ply knitted polyester cleanroom wipes are engineered for superior strength and critical contamination control. Laundered with 18 M Ω pure water and manufactured in ISO 4 certified facilities, they ensure an ultra-low level of linting and particle generation. Designed for versatility, these wipes offer excellent absorbency and compatibility with solvents such as IPA and acetone.

Technical Specifications

Material Composition	100% Polyester continuous filaments
Edge Sealing	Laser or Ultrasonic sealed edges
Cleanroom Standards	ISO 4, Class 10, Class 1000

Performance Features

Key Features

- Low-elasticity continuous filaments
- High absorbency and rapid absorption rate
- Compatible with IPA, acetone, and other solvents
- Ultra-low linting
- Stripe grain or grid grain options

Application Suitability

Grain Type	Best Use Case
Stripe Grain	Sensitive surface production
Grid Grain	Wiping stubborn stains

Packaging and Logistics

Packaging Details

Size	Pieces/Bag	Bags/Carton
9"x9"	100	20
6"x6"	100	20
4"x4"	400	40

Packaging Type	Double chamber vacuum packaging
