

2-SMD 3528 Waterproof LED Module

This high-intensity 2-SMD 3528 LED module is designed for various lighting applications. It features a compact design with two surface-mount LEDs, encapsulated in a waterproof housing for reliable performance in harsh environments.

Product Overview

High-Intensity LED Module

This 2-SMD 3528 LED module is engineered for high-intensity performance in demanding environments. Its compact, waterproof housing ensures reliable, long-term operation for outdoor signage and decorative lighting projects. By combining energy efficiency with robust durability, it serves as an ideal illumination solution for professional lighting installations.

Technical Specifications

Ingress Protection

Waterproof

Key Features

- Compact design
- High-intensity output
- Encapsulated housing
- Energy-efficient

LED Type

2-SMD 3528

Common Applications

Signage, Decorative Lighting, Outdoor Illumination
