

2-Ton Foldable Hydraulic Engine Crane

This hydraulic engine crane is designed for lifting, lowering, and transporting engines, differentials, and other heavy loads with ease. Featuring a foldable design for convenient storage, it boasts a 2-ton (4000 lbs) capacity.

Product Overview

Professional Hydraulic Engine Crane

This 2-ton foldable hydraulic engine crane is engineered for efficient lifting, lowering, and transporting of heavy automotive components like engines and differentials. Built with heavy-gauge, welded square tubular steel, it ensures exceptional stability and durability in demanding workshop environments. The integrated hydraulic long ram system features a built-in safety bypass valve to prevent overloading, providing peace of mind during operation.

Technical Specifications

Load Capacity

2000 kg

Max Capacity

500 kg

Min Capacity

Lifting Range

2200 mm

Net Weight

86 kg

Design & Features

Safety Systems

- Hydraulic long ram
- Built-in by-pass system
- Overload protection safety valve

Storage

Foldable Design

Construction

Heavy-gauge steel, Welded construction, Square tubular steel

Mobility

Yes
