

2-Ton Hydraulic Bottle Jack for Automotive and Industrial Use

This heavy-duty 2-ton hydraulic bottle jack is designed for lifting applications. It features a robust construction for reliable performance and durability.

Product Overview

Professional Lifting Solution

This heavy-duty 2-ton hydraulic bottle jack is engineered for demanding lifting applications in automotive repair, construction, and industrial environments. Its robust welding construction ensures long-term reliability and durability under load. Designed for efficiency and control, this compact unit offers portability and easy storage without compromising on performance.

Key Specifications

Lifting Capacity

2 Ton

Capacity

Recommended Applications

Automotive Repair, Construction, Industrial Use

Construction & Design

Design Features

- Robust construction
- Compact design
- Controlled lifting mechanism

Construction Type

Welding Hydraulic
