

2-Ton Low-Headroom Electric Chain Hoist

This electric chain hoist is designed for low-headroom applications, providing efficient lifting in confined spaces. With a 2-ton capacity, it is suitable for various industrial and construction lifting tasks.

Product Overview

Designed for Confined Spaces

This 2-Ton Low-Headroom Electric Chain Hoist is engineered specifically for industrial and construction environments where vertical space is limited. Its compact, low-profile design maximizes lifting height, ensuring efficient operation in tight areas. Built for durability and reliability, the unit features robust construction, a heavy-duty chain, and precise control capabilities to handle demanding lifting tasks safely.

Performance Metrics

Lifting Capacity

2 Ton
Capacity

Best For

Industrial Lifting, Construction, Low-Headroom Applications

Key Features

Included Components

- Control pendant for precise operation
- Chain container for safety and organization
- Robust lifting chain
- Durable hook assembly

Design Advantages

Compact Design • Low Profile • High Efficiency
