Overview

Versatile 2-Ton Mini Excavator

This compact 2-ton mini excavator is engineered for high performance in confined spaces, making it an ideal choice for municipal landscaping, greenhouse soil management, and urban construction projects. Featuring a robust hydraulic system and intuitive controls, it offers exceptional precision for digging, lifting, and material mixing. Its durable design ensures reliability for professional tasks ranging from concrete crushing to fruit-land nursery maintenance.

Key Performance Metrics

Bucket Capacity

0.06 m³

Bucket Capacity

Overall Dimensions

Machine Dimensions

Dimension	Value
Overall Width	1060
Overall Height	2300
Overall Length	3800
Ground Clearance	230

Operating Range

Digging Capabilities

- Max Digging Reach: 2150 mm
- Max Digging Depth: 3275 mm
- Max Digging Height: 2310 mm
- Max Dumping Height: 1740 mm
- Max Vertical Digging Depth: 1500 mm

Swing Radius

1440 mm

Track Specifications

Track Configuration

Parameter	Value
Ground Contact Length	1090
Track Width	230
Track Gauge	820

Applications

Recommended Applications

Greenhouse Soil Management, Municipal Landscaping, Tree Planting, Concrete Crushing, Material Mixing, Narrow Space Construction
