Product Overview

Performance-Driven Mining Solution

The 2-Ton Underground Wheel Loader is a compact, diesel-powered machine specifically engineered for high-efficiency material handling in confined tunnel environments. It features premium brand-name hydraulic and powertrain components, ensuring maximum reliability in harsh mining conditions. With articulated steering and an ergonomic control layout, this loader offers superior maneuverability and operational comfort for demanding underground applications.

Performance

Rated Payload

2 metric ton

Rated Payload

1 m3

Loading Volume

Operational Specs

Metric	Value
Max Breakout Force	42 kN
Max Traction Force	50 kN
Max Dumping Height	1000 mm
Travelling Speed	0-12 km/h

Technical Specs

Powertrain

- Deutz Engine (D914L04)
- Hydrostatic Variable Pump (Sauer-Danfoss or Eaton)
- PC15B Fenyi Drive Axles

Certifications

CE, QS9001

Dimensions

Transport Dimensions

5560mm x 1320mm x 1900mm
