HD screen, clear and stable images

IP system products possesses flexibility and expandability

System Overview

Advanced 2-Wire Villa Intercom Solution

This 2-wire digital intercom system offers a streamlined security solution for villas, utilizing existing wiring to eliminate the need for costly renovations. The system supports high-definition video surveillance with a wide 120-degree viewing angle and day/night vision capabilities. It integrates intercom communication, remote unlocking, and messaging features into a centralized, easy-to-install package designed for reliable residential security.

Installation & Compatibility

Installation Advantages

- Uses existing house wiring
- No re-wiring required
- Centralized power supply
- Power and signal transmitted over 2 wires

Wiring Requirement	2-Wire Non-Polarity
