

20 ft Intermodal Container with Full Side Access

This 20-foot container is designed for intermodal transport. It features full side access in addition to rear access.

Product Overview

20 ft Intermodal Container with Full Side Access

This 20-foot standard shipping container is constructed from durable corrugated steel, engineered for the secure intermodal transport of goods. It features full side access, facilitating efficient loading and unloading of diverse cargo types. Designed to adhere to international ISO standards, it includes corner castings for lifting and forklift pockets for handling, ensuring compatibility with global logistics infrastructure.
