

# 20 ft Ventilated High Cube Container with Side Door and Mezzanine Deck

This 20-foot ventilated high cube container is equipped with a side door and a mezzanine deck. It is designed for cargo that requires enhanced ventilation during transport or storage, while the mezzanine deck maximizes the use of the container's volume by providing a tiered storage solution.

## Overview

### Specialized Storage and Transport Solution

This 20 ft Ventilated High Cube Container is engineered for cargo that requires consistent airflow during transit or storage. Featuring a high cube design for increased vertical clearance, a side door for flexible loading access, and an integrated mezzanine deck, it maximizes usable volume. It is an ideal solution for agricultural goods, textiles, and other moisture-sensitive products that benefit from tiered organization.
