

20-Gallon Parts Washer with Service Shelf

This 20-gallon parts washer is designed for cleaning greasy and dirty automotive, industrial, and mechanical parts. It features a removable tank for easy solution changes, a flexible nozzle for targeted cleaning, and an integrated service shelf for tool storage.

Overview

Professional Cleaning Solution

This 20-gallon parts washer is designed for efficient cleaning of automotive, industrial, and mechanical components. It features a recirculating solvent system that conserves cleaning fluid while providing a continuous flow for heavy-duty degreasing. With its integrated service shelf and mobile caster design, this unit offers both convenience and flexibility for any professional workshop environment.
