

20-Inch Folding Bicycle with Steel Frame

This folding bicycle has a 20-inch frame made of folding steel, offering both portability and strength. It features a steel fork, double-wall rims, a single-speed drivetrain, and 20x1.75 tires.

Product Overview

Compact Urban Mobility

The QJ-FB-5 is a versatile 20-inch folding bicycle engineered for urban commuters and recreational riders who prioritize portability without sacrificing durability. Featuring a robust folding steel frame and a reliable steel fork, this bike offers a stable ride while remaining easy to store in tight spaces. Its single-speed drivetrain minimizes maintenance, making it an efficient choice for daily travel.
