

20-Inch Wall-Mounted Misting Fan

This wall-mounted misting fan utilizes a centrifugal secondary atomized design to deliver cooling. The 20-inch fan is designed for wall mounting to save space and is suitable for residential and commercial use.

Product Overview

Industrial Cooling Solution

This 20-inch wall-mounted misting fan provides efficient cooling through a combination of high-velocity air circulation and fine water mist. Designed for professional environments, it features a direct water connection for automated refilling, ensuring continuous operation without manual intervention. Its wall-mounted configuration optimizes floor space, making it an ideal choice for patios, workshops, and commercial areas.

Technical Specifications

Performance Metrics

1350 rpm

Rotation Speed

170 m3/min

Air Flow

180 W

Power Consumption

Detailed Technical Data

Property	Value
Model Number	AA060018A
Voltage	220 V
Frequency	50 Hz
Fan Size	20 inches

Design and Installation

Mounting Type	Wall-mounted
Water Supply	Direct Connection, Automatic Refill
