Overview

Reliable Power Solution

This 20 kVA diesel generator is engineered for consistent and efficient performance, serving as a dependable primary or backup power source. Featuring a robust, soundproof enclosure and advanced control systems, it is designed for demanding industrial, commercial, and residential applications. The unit prioritizes ease of maintenance, low fuel consumption, and operational safety to meet professional power requirements.

Technical Specifications

Rated Output

20 kVA

Rated Output

Voltage Range	110-277V (L-N), 220-480V (L-L)
Frequency	50/60Hz
Cooling Method	Closed water-cooled or air-cooled
Noise Level	75 dB

Control & Protection

Control Panel Features

- Standard engine instrumentation
- Voltmeter with selector switch
- Ammeter with selector switch
- Frequency meter
- Current transformers
- MCB with overload and short-circuit protection

Optional Upgrades

AMF Control Panel • ATS (Automatic Transfer Switch)

Compliance & Standards

Certifications

ISO9001, ISO14001, CE, SASO, SONCAP, RETIE

Logistics & Ordering

Production Lead Time

25-45 working days

Minimum Order Quantity

20FT container of mixed models
