

2.0 kVA Gasoline Generator Set

This gasoline generator set delivers a 2.0 kVA output for portable power needs. It features a gasoline-powered engine coupled with an alternator to produce AC power.

Overview

Reliable Portable Power

The 2.0 kVA gasoline generator set is engineered for versatile, portable power needs across various professional environments. Designed for durability and ease of use, this unit provides consistent AC power output suitable for construction sites, outdoor events, and emergency backup scenarios. Its robust construction ensures reliable performance in demanding conditions.

Technical Specifications

Rated Power Output

2 kVA

Power Capacity

Fuel Type	Gasoline
Power Source	Gasoline-powered engine with alternator

Usage & Applications

Key Design Features

- Portable design
- Robust construction
- User-friendly operation
- Easy maintenance

Ideal Applications	Construction Sites, Outdoor Events, Emergency Backup
