

20-Liter Thermoelectric Cooler/Warmer

This thermoelectric cooler and warmer has a 20-liter capacity and can cool to 18-20°C below ambient temperature or heat to 60±5°C. It includes detachable power cords for AC220V/110V or DC12V power supplies.

Product Overview

Versatile Thermal Control

The 20-Liter Thermoelectric Cooler/Warmer provides flexible temperature management for both heating and cooling needs. Engineered for portability and convenience, it is compatible with standard home/office power outlets and vehicle power sources. Its dual-mode functionality makes it an essential tool for camping, office environments, and travel.
