

20 MT Capacity Cargo Trolley

Machinery movers facilitate frequent material handling in manufacturing environments. This heavy-duty cargo trolley has a 20 MT capacity and durable steel rollers for smooth movement across surfaces.

Product Overview

Heavy-Duty Material Handling

The 20 MT Capacity Cargo Trolley is a robust material handling solution engineered for the transport of large machinery and heavy equipment in industrial environments. Designed with high-capacity thickening technology, the load-bearing plate ensures deformation-free performance within its rated capacity. Its versatile design facilitates smooth, accurate movement, making it an essential tool for manufacturing plants and material transport operations.

Technical Specifications

Rated Load Capacity

20 MT

Capacity

Net Weight	33 kg
Model Number	CT-20

Key Features

Design Advantages

- Thickened load-bearing plate for deformation resistance
- Engineered for heavy machine relocation
- Durable steel roller construction
- Versatile configurations for different movement situations

Compliance & Usage

Industrial Applications	Manufacturing Plants, Material Transport, Heavy Machinery Moving
Service Availability	Yes
