

20-Person Marine Inflatable Liferaft

This inflatable liferaft is designed for marine applications and can accommodate up to 20 people. It is designed for storage at a height of 18~36m and is SOLAS approved.

Overview

High-Capacity Marine Safety

This professional-grade inflatable liferaft is engineered for high-capacity marine emergency situations, capable of accommodating up to 20 persons. Designed for maximum visibility and protection, the unit features a durable, weather-resistant orange canopy and robust inflatable buoyancy tubes for superior stability on the water. It serves as an essential safety asset for commercial and passenger vessels requiring reliable, rapid-deployment life-saving equipment.
