

2.0 Ton Electric Counterbalance Forklift

The 2.0 ton electric counterbalance forklift is equipped with an AC motor for powerful and economical performance. Its wide view mast and ergonomic design enhance operational efficiency.

Overview

High-Efficiency Electric Material Handling

This 2.0-ton electric counterbalance forklift is engineered for versatile material handling in both indoor and outdoor industrial environments. Featuring a clean electric powertrain, it delivers zero-emission operation and quiet performance, significantly improving workplace air quality and noise levels. The unit is designed with operator ergonomics in mind, including a comfortable seat and intuitive controls to sustain productivity throughout long shifts.
