

20-Ton Single-Acting Hydraulic Jack with 50mm Stroke

This single-acting hydraulic jack is designed for lifting, pushing, and spreading applications. It features a 20-ton capacity and a 50mm stroke with spring return.

Overview

Professional Performance in Compact Design

The 20-Ton Single-Acting Hydraulic Jack is a versatile tool engineered for precision lifting, pushing, and spreading in demanding industrial environments. With a 50mm stroke and a robust 20-ton capacity, it is specifically designed to fit into confined spaces where powerful force is required. This unit features a spring-return mechanism for controlled retraction and is suitable for operation in any orientation, making it an essential asset for maintenance, repair, and heavy-duty construction tasks.

Technical Specifications

Key Performance Metrics

20 T Capacity	50 mm Stroke	7.2 kg Weight
-------------------------	------------------------	-------------------------

Physical Dimensions

Parameter	Value
Original Height	153mm
General Height	214mm
Outer Diameter	98mm
Inner Diameter	73mm
Plunger Diameter	54mm

Hydraulic Properties

- Pressure Area: 22.9 cm²
- Oil Reserves: 0.16 L
- Mechanism: Single-acting with spring return

Features

Key Features

Compact Design, Spring Return, All-Position Operation, Portable
