

20-Tooth Sprocket for #40 Roller Chain

This 20-tooth sprocket is designed for use with #40 roller chain. It features a 5/8" bore and A plate design for power transmission applications.

Product Overview

High-Performance 20-Tooth Sprocket

This 40A20 sprocket is precision-engineered for seamless integration with #40 roller chains. Featuring a robust A-plate design with a 5/8-inch bore, it provides reliable power transmission for a wide range of industrial machinery. Built for longevity and consistent performance, this component is an ideal solution for conveyors, agricultural equipment, and other demanding mechanical systems.

Technical Specifications

Design Style

A-Plate

Number of Teeth

20

Bore Diameter

0.625 in

Compatible Chain Size

#40 Roller Chain

Applications

Common Applications

- Conveyor systems
- Agricultural equipment
- General mechanical power transmission
